

PANORAMA9.0: MANAGING FIREWALLS AT SCALE

The Palo Alto Networks Panorama 9.0: Managing Firewalls at Scale digital-learning course provides information that will help you:

- Learn how to configure and manage the next-generation Panorama™ management server
- Gain knowledge about configuring templates, template variables, and device groups
- Gain knowledge about administration, log collection, and logging and reporting
- Gain knowledge about Panorama high availability and Panorama troubleshooting
- Become familiar with planning and design considerations for Panorama deployment

Duration

2 Days (16 Hours)

Objectives

Successful completion of this digital-learning training will help the participant to gain in-depth knowledge about how to configure and manage their Palo Alto Networks Panorama management server. Upon completion of this course, participants should be familiar with the Panorama™ management server's role in managing and securing the network. Participants will be shown how to use Panorama aggregated reporting to provide them with a holistic view of a network that uses Palo Alto Networks next-generation firewalls.

Target Audience

Security Administrators, Security Operations Specialists, Security Analysts, Security Engineers, and Security Architects

Prerequisites Participants

must complete either the digital learning or instructor-led training version of the Firewall 9.0 Essentials: Configuration and Management course and understand the basic maintenance, management, and monitoring requirements for individual Palo Alto Networks next-generation firewalls deployed in typical network-architecture, routing, and IP-addressing scenarios.

Course Modules

- 1 - Initial Configuration
- 2 - Adding Firewalls
- 3 - Templates
- 4 - Device Groups
- 5 - Administrative Accounts
- 6 - Log Collection and Forwarding
- 7 - Aggregated Monitoring and Reporting
- 8 - Panorama Design: A Case Study
- 9 - Troubleshooting
